

One Key for All Your Data Protection Needs

Just one USB key to lock up data on all your computers, external hard drives, and all other data storage devices.

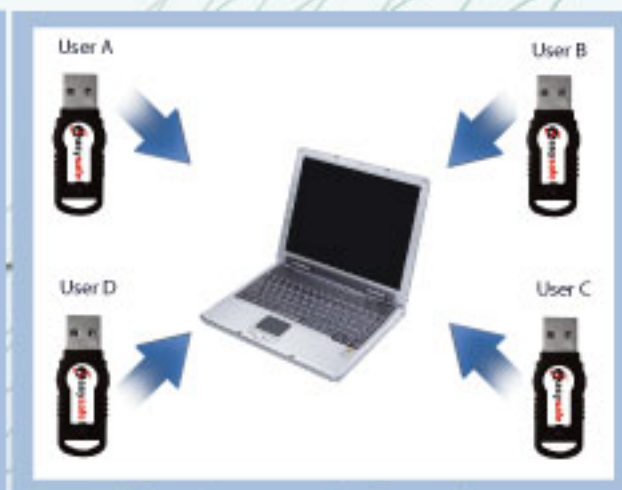

You cannot lock your PC all the time, but you can lock up your sensitive data.

Have peace of mind when:

- Someone else uses, services or repairs your computer - you need not stand behind and watch
- You back up data to an external drive - you need not lock the drive in a safe
- You lose your laptop or external drive - no one will be able to see your data

Easy-to-use key with strong encryption for added security

Multi-user environment

One key for different devices

**Just plug it in
and
get protected!**

Features:

- Easy to use - installs in minutes; all PC users can use easySafe without any training
- Two-level security - high-level hardware encryption plus personal password
- One easySafe protects multiple PCs and storage drives - at home and in the office
- Several easySafe keys allow sharing of the same PC without sharing private or sensitive data
- Second key is included for safekeeping or sharing

System Requirements:

- PC with USB support
- MS Windows® 2000, XP, Vista

Our unique twin-pack fits many uses:

• Personal:	1 for daily use	+	1 spare
• Corporate:	1 for user	+	1 for IT department
• Management:	1 for manager	+	1 for secretary
• School:	1 for student	+	1 for instructor
• Partners:	1 for you	+	1 for partner
• Family:	1 for kids	+	1 for parents

**No more need to
physically lock up
your computer**

This product is sold in over 20 countries worldwide. Just as with all security technology products, it does not protect your PC from theft, misplacement, alteration or destruction.
